CYCLE SERVICE POD

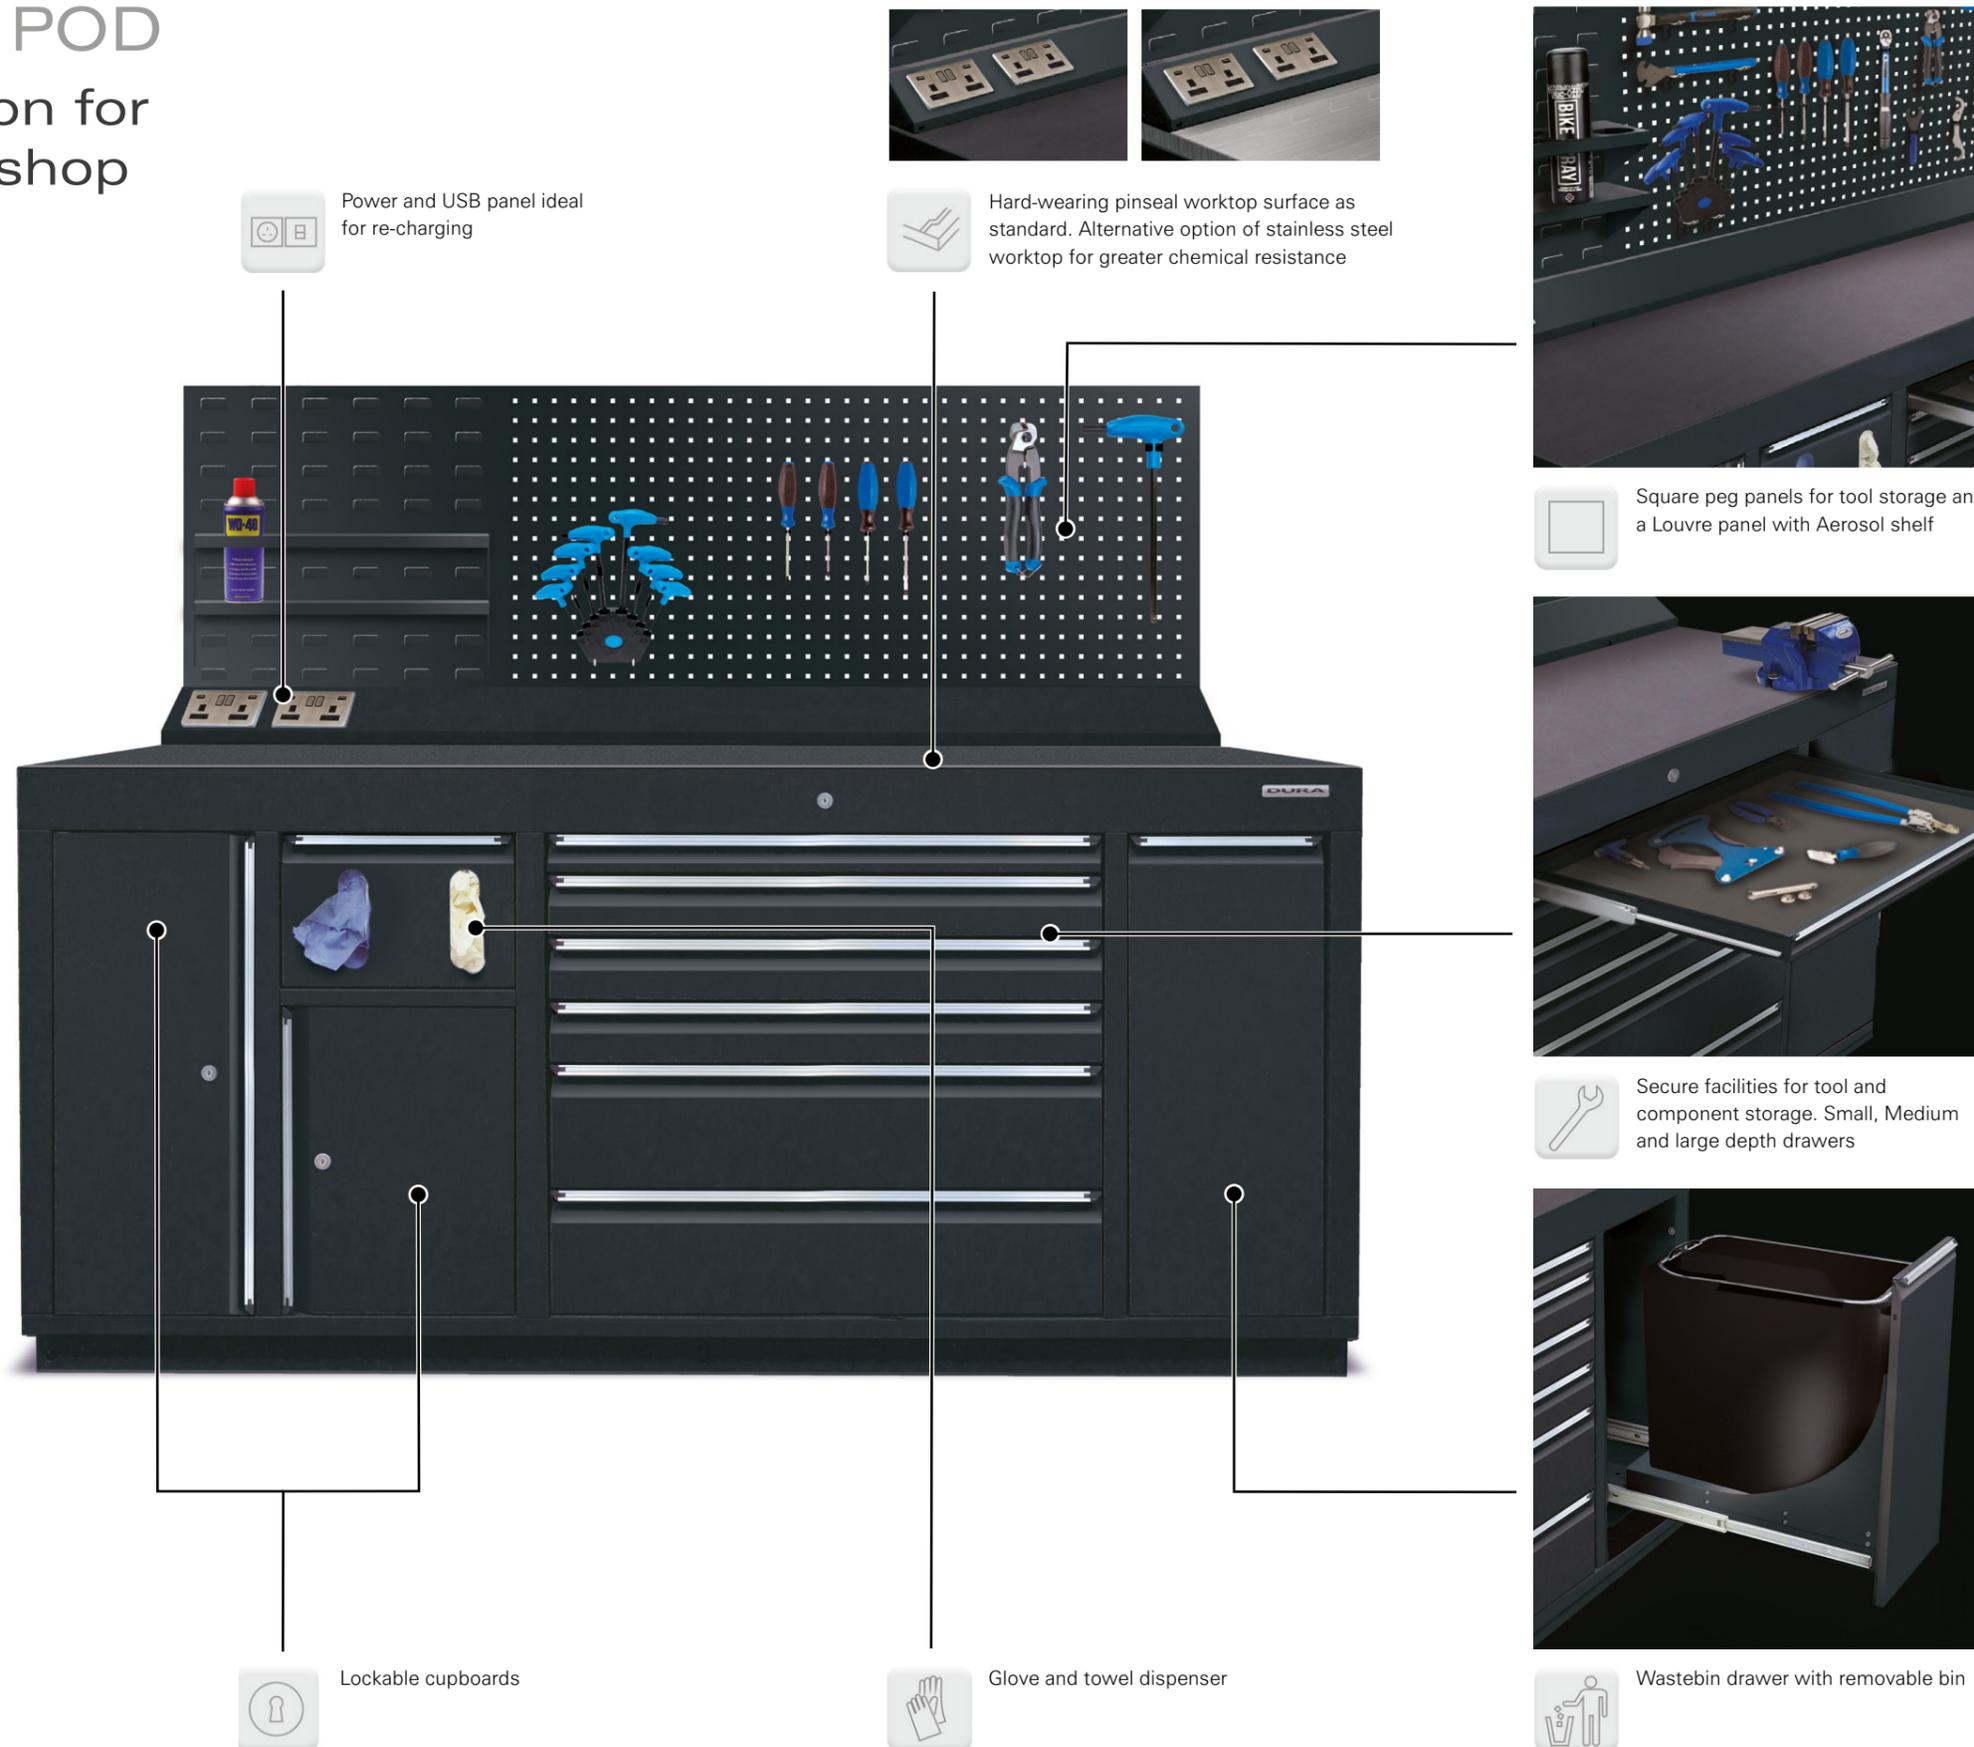

CYCLE SERVICE POD

The All-In-One Solution for the Cycle Retail Workshop

Drawing from our vast experience of cycle retail workshop fit-out projects, the Cycle ServicePod™ is a new concept that integrates every element required for cycle servicing in a single 'plug and play' unit. The 'all-in-one' solution features facilities for: secure tool and component storage, waste bin and towel & glove dispenser in a single pinseal topped 2 metre wide unit. The design integrates everything we know that the professional cycle technician demands including; electrical and USB outlets, aerosol can storage and a large peg board for cycle specific tool mounting.

Planning is simple and installation minimal, making the Cycle ServicePod™ ideal not just for new installations, but for enhancing your existing workshop. It is perfect for representing your brand and the growing trend for 'front of house' service areas. Different colour and logo decal options are available too.

- **Robust, practical, and functional, yet looks AMAZING!**
- **Maximise the use of precious space with its modularity**
- **Promote a tidy, organised and efficient work environment**
- **Present a clean and professional image to your customers**
- **Boost your brand**
- **Attract and retain the best workshop crew**

Power and USB panel ideal for re-charging

Hard-wearing pinseal worktop surface as standard. Alternative option of stainless steel worktop for greater chemical resistance

Square peg panels for tool storage and a Louvre panel with Aerosol shelf

Secure facilities for tool and component storage. Small, Medium and large depth drawers

Lockable cupboards

Glove and towel dispenser

Wastebin drawer with removable bin

The 600 Series:

The Modular Solution for the Smarter Cycle Workshop

In addition to the Cycle ServicePod, Dura offer the 600 Series range – a fully customisable solution for fully tailored workshop installations. This award-winning system, of over 400 cabinets and accessories, provides the ultimate choice and flexibility for your workshop layout, and has been used worldwide within the automotive sector for over 20 years.

As with the Cycle ServicePod, the 600 series can be custom coloured and fitted with graphics to meet your brand standards, and are planned by the same expert design team that have designed flagship workshop areas for luxury automotive brands around the globe.

To discover how you can use Cycle ServicePod™ to enhance your companies service offerings, or to promote aftermarket sales, please call us 01280 706050 or visit www.duraworkshops.co.uk.

“It’s an amazing environment in which to work! I am so glad that Dura were recommended to us. We now have Dura in our City and Canary Wharf stores and plan a refurb of our West End store later in the year, so naturally we will be fitting it out with a Dura Workshop. It’s also great to work with a British design and manufacturing company.”
